The diagram illustrates a user interface for editing album captions. It consists of several components: a table for displaying album items, a text input field for entering new captions, and a set of buttons for user interaction. The table has two columns: 'Photo' and 'Caption'. The first row contains a placeholder '(Image Thumbnail)' and '(Example Caption)'. Below this are three empty rows. To the right of the table is a text input field labeled 'New Caption' with a placeholder 'Enter New Caption'. An arrow points from this field to the label 'Text'. Below the input field are two buttons: 'Ok' and 'Cancel'. Arrows from both buttons point to a label 'Button'. At the bottom right are two buttons: 'Logout' (yellow) and 'Quit' (red). The entire interface is titled 'Opened Album (text)'.
